

Hospital Visit Knowledge Base: Diseases, Symptoms, Treatments, and Drugs

This document provides a structured overview of common diseases encountered in hospital visits, detailing their typical symptoms, standard treatments, and frequently prescribed medications. This information is designed to be easily digestible for human readers and also serves as a valuable resource for demonstrating the power of hybrid data solutions, combining vector search with graph databases.

Each disease entry below can be thought of as a "document" that can be vectorized (converted into numerical embeddings) and stored in a vector database. This allows for semantic search capabilities, where a user can query using natural language (e.g., "what causes headaches and fatigue?") and retrieve relevant disease descriptions, even if the exact keywords aren't present. Simultaneously, a graph database, built from the original visit records, can provide relational insights (e.g., "which doctors treat this disease?", "which patients have this condition?").

Disease: Common Cold

Description: A common viral infection of the nose and throat. It is usually harmless, although it might not feel like it.

Common Symptoms:

- Dizziness
- Joint pain
- Cough
- Sore throat
- Fatigue
- Body ache

Typical Treatments:

- Symptomatic Relief
- Rest and Hydration

Frequently Prescribed Drugs:

- Paracetamol (500mg)
- Multivitamin (Daily)

Disease: Bronchial Asthma

Description: A chronic respiratory condition characterized by inflammation and

narrowing of the airways, leading to difficulty breathing.

Common Symptoms:

- Difficulty breathing (implied by diagnosis)
- Coughing (implied by diagnosis)
- Wheezing (implied by diagnosis)

Typical Treatments:

- Inhaler Therapy

Frequently Prescribed Drugs:

- Salbutamol Inhaler
- Multivitamin (Daily)

Disease: Sprain (Ankle)

Description: An injury to the ligaments in the ankle, typically caused by a sudden twist or roll of the foot.

Common Symptoms:

- Sudden onset of pain (in relevant area, e.g., ankle)
- Swelling (implied by diagnosis)
- Tenderness (implied by diagnosis)

Typical Treatments:

- Pain Management
- Rest and Hydration (for acute cases)

Frequently Prescribed Drugs:

- Ibuprofen (400mg)

Disease: Allergic Rhinitis

Description: An allergic reaction that causes sneezing, stuffy nose, watery eyes, and an itchy nose, throat, or eyes. Often seasonal.

Common Symptoms:

- Rash (skin redness)
- Sneezing (implied by diagnosis)
- Runny nose (implied by diagnosis)
- Itchy eyes (implied by diagnosis)

Typical Treatments:

- Symptomatic Relief

Frequently Prescribed Drugs:

- Cetirizine (10mg)

Disease: Anemia

Description: A condition in which the blood lacks healthy red blood cells, leading to reduced oxygen flow to the body's organs.

Common Symptoms:

- Fatigue
- Dizziness

Typical Treatments:

- Iron Supplementation

Frequently Prescribed Drugs:

- Iron Folic Acid Tablet
- Multivitamin (Daily)

Disease: Gastritis

Description: Inflammation of the stomach lining, often caused by bacterial infection, stress, or regular use of certain pain relievers.

Common Symptoms:

- Stomach pain
- Tenderness in abdomen
- Sudden onset of pain (in abdomen)

Typical Treatments:

- Symptomatic Relief
- Medication Adjustment (for chronic cases)

Frequently Prescribed Drugs:

- Pantoprazole (40mg)

Disease: Viral Fever

Description: A fever caused by a viral infection. Symptoms vary widely depending on

the specific virus.

Common Symptoms:

- Fever
- Body ache

Typical Treatments:

- Symptomatic Relief

Frequently Prescribed Drugs:

- Paracetamol (500mg)

Disease: Arthritis

Description: Inflammation of one or more joints, causing pain and stiffness that can worsen with age.

Common Symptoms:

- Joint pain (primarily in elderly patients)

Typical Treatments:

- Physiotherapy
- Pain Relief Medication

Frequently Prescribed Drugs:

- Ibuprofen (400mg)
- Multivitamin (Daily) (occasionally prescribed for general health)

Disease: Tonsillitis

Description: Inflammation of the tonsils, typically caused by viral or bacterial infection, resulting in a sore throat and difficulty swallowing.

Common Symptoms:

- Sore throat (implied by diagnosis)
- Difficulty swallowing (implied by diagnosis)

Typical Treatments:

- Antibiotic Course (for bacterial tonsillitis)

Frequently Prescribed Drugs:

- Amoxicillin (500mg)

Disease: Hypertension (High Blood Pressure)

Description: A common condition in which the long-term force of the blood against your artery walls is high enough that it may eventually cause health problems, such as heart disease.

Common Symptoms:

- Often asymptomatic (implied by routine check-ups)

Typical Treatments:

- Lifestyle Modification (Dietary Counseling, Exercise)

Frequently Prescribed Drugs:

- Amlodipine (5mg)
- Multivitamin (Daily) (occasionally prescribed for general health)

Disease: Hypothyroidism

Description: A condition in which the thyroid gland doesn't produce enough crucial hormones.

Common Symptoms:

- Fatigue (implied by diagnosis)
- Weight gain (implied by diagnosis)

Typical Treatments:

- Thyroid Hormone Replacement

Frequently Prescribed Drugs:

- Levothyroxine (50mcg)

Disease: Type 2 Diabetes Mellitus

Description: A chronic condition that affects the way your body processes blood sugar (glucose).

Common Symptoms:

- Often asymptomatic in early stages (implied by management)

Typical Treatments:

- Insulin Therapy
- Lifestyle Modification

Frequently Prescribed Drugs:

- Metformin (500mg)

Disease: Minor Cut/Abrasion

Description: A superficial injury to the skin, typically caused by friction or a sharp object.

Common Symptoms:

- Injury from fall/accident (implied by visit notes)

Typical Treatments:

- Wound Dressing

Frequently Prescribed Drugs:

- Multivitamin (Daily) (possibly for overall healing support)

Disease: Dengue Fever

Description: A mosquito-borne tropical disease caused by the dengue virus.

Common Symptoms:

- Fever
- Body ache

Typical Treatments:

- Symptomatic Relief

Frequently Prescribed Drugs:

- Paracetamol (500mg)
- Oral Rehydration Salts (ORS)

Disease: Seasonal Flu

Description: A common viral infection that attacks the respiratory system, typically occurring seasonally.

Common Symptoms:

- Cough
- Cold
- Fever (implied)
- Body ache (implied)

Typical Treatments:

- Rest and Hydration

Frequently Prescribed Drugs:

- Paracetamol (500mg)
- Multivitamin (Daily)

Disease: Conjunctivitis

Description: Also known as pinkeye, is an inflammation of the conjunctiva, the transparent membrane that lines the eyelid and covers the white part of the eyeball.

Common Symptoms:

- Eye redness (implied by diagnosis)
- Eye irritation (implied by diagnosis)

Typical Treatments:

- Eye Drops

Frequently Prescribed Drugs:

- Ofloxacin Eye Drops

Disease: Migraine

Description: A type of headache characterized by severe throbbing pain or a pulsing sensation, usually on one side of the head, and often accompanied by nausea, vomiting, and extreme sensitivity to light and sound.

Common Symptoms:

- Sudden onset of pain (head pain)

Typical Treatments:

- Pain Management
- Consultation with specialist (for complex cases)

Frequently Prescribed Drugs:

- Ibuprofen (400mg)

Disease: Urinary Tract Infection (UTI)

Description: An infection in any part of your urinary system — your kidneys, ureters, bladder and urethra. Most infections involve the lower urinary tract — the bladder and

the urethra.

Common Symptoms:

- Sudden onset of pain (in urinary tract area)
- Burning sensation during urination (implied by diagnosis)
- Frequent urination (implied by diagnosis)

Typical Treatments:

- Antibiotic Course

Frequently Prescribed Drugs:

- Ciprofloxacin (250mg)
